Dear Resident:

Since the last update to residents, the Village, Tollway, and the Tollway's engineering consultant Wight and Company, continue to assess and evaluate several options for a soundwall adjacent to I-55 and Heritage Parkway. This has included field surveying work along Heritage Parkway to gather additional data.

The identification of potential cost-effective options for a soundwall should be completed in the next couple of weeks. With this data, the Tollway and Village can better evaluate alternatives including use of the Tollway's contractor, Lorig.

The Village will continue to provide residents updated information on these efforts.
